## Digital RGB LED Strip

The SIRS-E® **Pix Digital Series**, utilizes integrated IC technology per LED to communicate and reproduce millions of colors. Create captivating effects that are limited only by the imagination of it's user. Take advantage of this UL Class 2 Listed professional grade of Digital RGB LEDs.

It's slim 10mm profile allows it to fit into various mounting channels for multiple lighting applications. Easily mountable utilizing 3M VHB Aero-Grade tape, engineered to dissipate heat.

The **PIX** series provides amazing results for all kinds of entertainment applications such as commercial, residential, productions, shows, and many more.

- **UL Class 2 Listed Digital Strip**
- Cuttable every pixel **(16.5mm)** allowing for precise designs.
- Improved Digital LED density **60 LEDs/m**
- Smooth transition dimming curves
- Higher refresh rate for cinematography

Delivering superior LED strip lighting with a proven record spanning more than a decade without electrical, chromatic, or color rendering issues. SIRS-E® continues to lead the market place in stability, reliability, and efficiency of LED lighting and lighting control systems.
