

Wiring Diagram

Connect any 1, 3, 4, or 5 channel LED strip to the PILOTINO™ PCB directly utilizing the board's output channel 1-5

Current and power output per channel @12V are 2.5A and 30W max respectively

Current and power output per channel @ 24V are 2.5A and 60W max respectively

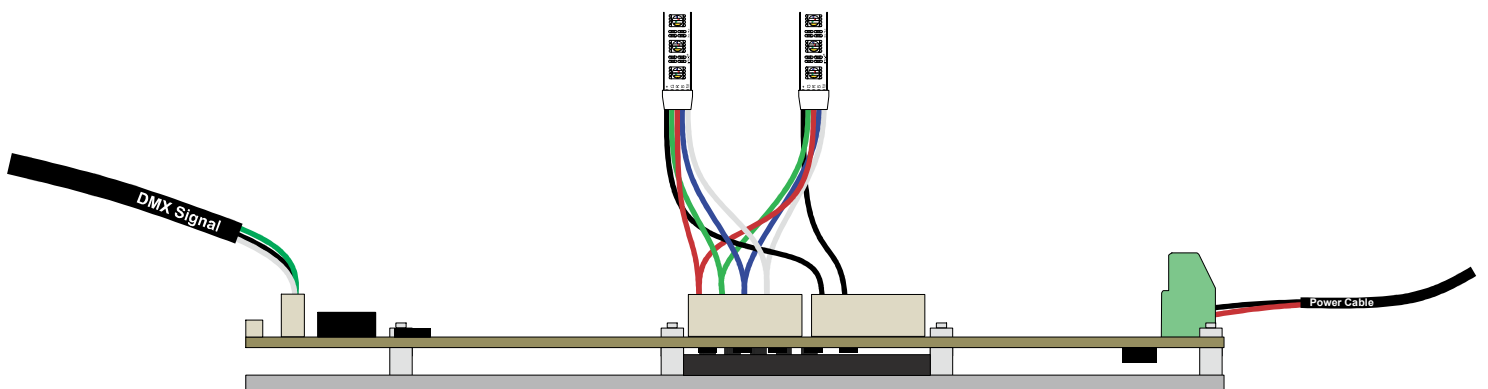

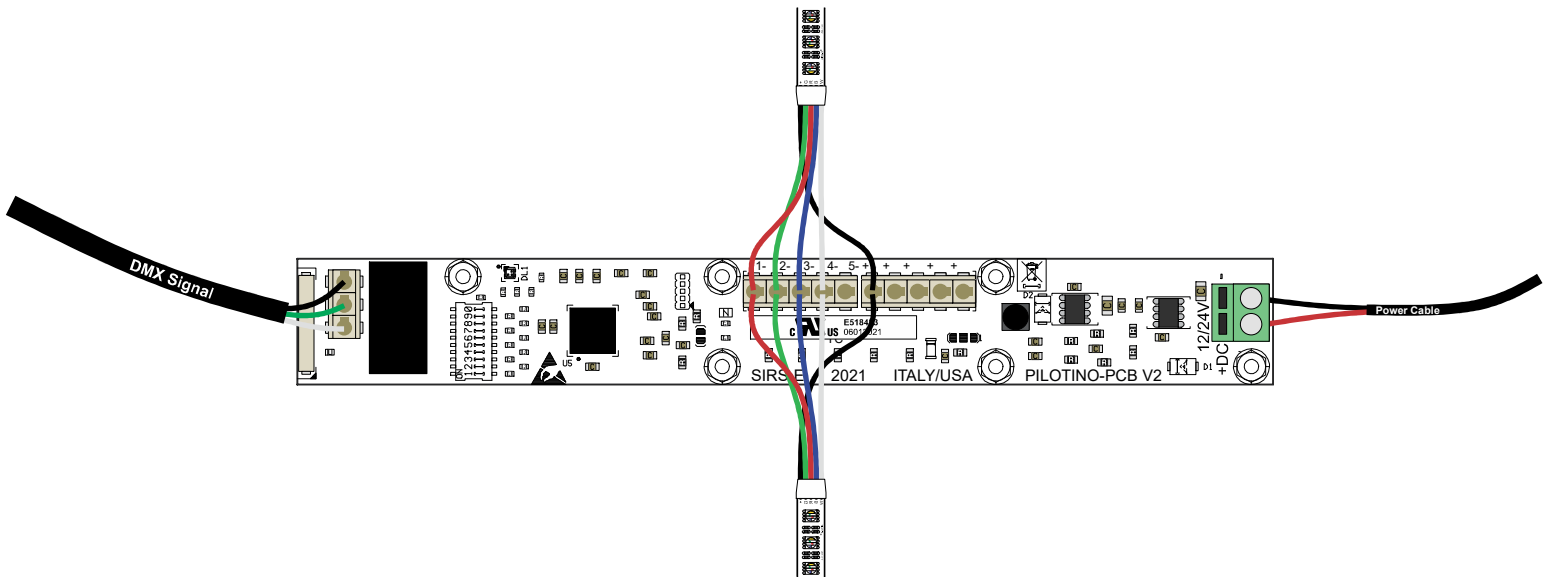

Wiring Diagram

Connect any 1, 3, 4, or 5 channel LED strip to the PILOTINO™ PCB directly utilizing the board's output channel 1-5

Can only connect up to two strips on the output channels of the PILOTINO™ PCB

Current and power output per channel @12V are 2.5A and 30W max respectively

Current and power output per channel @ 24V are 2.5A and 60W max respectively

Wiring Diagram

Daisy Chaining the DMX Signal Cable to multiple PILOTINO™ PCB
 Connect any 1, 3, 4, or 5 channel LED strip to the PILOTINO™ PCB directly utilizing the board's output channel 1-5

Current and power output per channel @12V are 2.5A and 30W max respectively
 Current and power output per channel @ 24V are 2.5A and 60W max respectively
