

Fountain People – San Marcos, Texas

Dynamic lighting control for iconic installations.

Pharos provides you with the versatility, flexibility and power you need to install dynamic architectural lighting control solutions across a wide range of projects. You can trust the Pharos DMX controllers to run day and night, illuminating everything from modest interiors to international landmarks and historic architecture; from airports, stadiums and bridges to complex theme parks and even the façade lighting of a whole city. With the reliability you expect from Pharos and the expertise in dynamic lighting in architecture and entertainment: an easy to install, easy to use control solution.

The fountain project was originally done with the ACCLAIM Lighting ART 500 DMX Controller. You can use Pharos as an upgrade to do similar projects like the fountain LED lighting effects.
