

High Rise Condos – Dallas, Texas

This new edition of the DMX-CON4 DMX decoder used in the project has a frequency of 5.2 kHz which allows it to be used for video applications with no camera flickering. This LED Decoder provides you with the freedom to control 4 channels of LED strip, LED modules, and each channel provides you control from 1-256 levels of intensity. This decoder complies with DMX 512/1990 Protocol.

Project by Neotek Inc.
