

Little Creek Casino – Shelton, Washington

Achieving stunning DMX installations is easy with the DMX RGB Vertical Tube by SIRS-E®. You now can enjoy the benefits of DMX with a double sided strip, allowing for a 360° effect. We currently offer two mode sets of control: pixel by pixel and bi-pixel options to meet your project needs.

The custom double sided LED strip is encapsulated by a waterproof housing allowing for various installation types. Due to the use of a 3-way connector, creating a series of tubes for an installation can be done in a fraction of the time at a fraction of the price. In the event that you want something a bit more complex, call us and we will be more than happy to identify the correct hardware and software necessary to complete your project. It's almost too good to be true.
